

Kyo320 ver. 2.15

VERSION HISTORY (> 2.12)

✓ 2.15 (2015-09-25)

- **Added compatibility:**

this version adds compatibility with BXM12/50-B v.1.1 power station.

✓ 2.13 (2013-09-10)

- **Improvement feature on duplicate PIN management:**

from this version it will not be possible to have 4 digits installer codes in the range 0000-0200.

- **New behavior on “Disable arming on partition alarm” option.**

When it is checked, you can arm a partition with a tamper on a zone, if the tamper can not be excluded.

- **Increased performance on the following features:**

- alarm on zones in AND;
- double event over IP on K-NET;
- display zones on different partition;
- output activation for not activated user;
- initialization of K3-VOX;
- welcome string on CLASSIKA LCD, PREMIUM LCD e ABSOLUTA T-LINE.
