

Camera Mount Instruction

1. Before beginning, make sure you have three screws. The outer diameter of the screw thread is 4.15mm.
2. Determine where to mount the IP Camera.
3. Drill three holes on the wall or ceiling. The dimensions are as follows:

3.1 with anchor:

3.2 without anchor:

4. Fix stand on the wall or ceiling using three self-tapping screws.
5. Adjust and fix the IP camera to the desired field of view.

* The camera mount kits are included in the package.
