

i-on Compact

Keeping you and your customers securely connected

A wireless intruder panel built with cybersecurity in its DNA. The Compact is Eaton Secureconnect™ enabled.

SecureConnect is a smart intruder system, protecting people and property against physical and digital threats.

Connect the Compact to the installer Cloud and end user App to ensure you and your customer are securely connected to what matters most.

A smart, entry-level solution for homes . . .

- Single box solution - reducing installation time
- Eaton SecureConnect™ enabled - increase your revenue stream with 24/7 remote access to Cloud and customer App
- Low profile discreet design - provide your customers with a non-intrusive alarm system to fit in any location within their home
- 40 years Scantronic radio expertise - you can depend on
- Future Flexible - as new features are introduced you can update the system remotely or locally
- Field proven tried and tested i-on platform - giving you a common interface across the i-on family
- Built in Ethernet IP - for flexible and secure communication options
- EN50131 Grade 2, INCERT & NFA2P - independently approved
