

# Aurora

## CBS100 Platform Base Sounder

### SPECIFICATION

The CBS100 platform sounder has been developed to provide the ideal solution for most applications.

The housing has been designed to match all the bases of AURORA smoke detectors

There is a local volume switch on each unit to allow individual sounders to be increased as necessary to suit every application.

If the unit is not being used in conjunction with a detector, a lockable cover plate can be fitted to convert the unit into a stand-alone wall or ceiling mounted sounder.

### TECHNICAL SPECIFICATIONS

Power Supply	12-30 V
Current Consumption @ 24V	4 mA — 8mA
Operating Temperature Range	-20°C / +70°C
Sound output	87dBa 93dBa
Number of tones	4
Operatig frequency	800Hz — 1000Hz
Colors	White
Weight	110 gm
